CREW & TRADES QUICK GUIDE

Scan the job. See the scope.

How the jobsite QR code works. No app, no login, no money data.

1 Find the QR code

Look for the Jobledgerhq flyer posted in the job trailer, garage or site board. Your contractor may also text you the link.

2 Scan with your camera

Open your phone camera, point it at the code and tap the link that pops up. It opens in your browser. Nothing to install.

3 Read the scope by trade

Work is grouped by trade and category (framing, electrical, plumbing, finish). Find your trade and see exactly what to build.

4 Check approved extras

Approved change orders show on the page. If extra work is not listed there, it is not approved yet. Ask the office before you start it.

5 Follow site notes

Gate codes, parking, dumpster location and safety rules are at the top. When the office updates them, assigned crew get an alert.

6 Keep the link handy

Save the page to your Home Screen or bookmark it. It always shows the latest scope, so check it each morning.

Your contractor's numbers stay private

This page never shows prices, costs, margins or contract totals. Money data is removed on the server before the page loads, not just hidden.

Quick answers

The link won't open? Make sure you have signal and scanned the whole code. Ask the office for a fresh link.

Something looks wrong? Call or text the office. Do not start work that isn't on the scope or an approved change order.

Who sees this page? Only people with the code or link. The office can reset it at any time.
